 Configuring mysql-apt-config
 MySQL APT Repo features MySQL Server along with a variety of MySQL components.
 You may select the appropriate product to choose the version that you wish to
 receive.
 Once you are satisfied with the configuration then select last option 'Ok' to
 save the configuration, then run 'apt-get update' to load package list. Advanced
 users can always change the configurations later, depending on their own needs.
   1. MySQL Server & Cluster (Currently selected: mysql-5.7)
   2. MySOL Tools & Connectors (Currently selected: Enabled)
   3. MySQL Preview Packages (Currently selected: Disabled)
   4. 0k
 Which MySQL product do you wish to configure?
 Use of uninitialized value $_[1] in join or string at /usr/share/perl5/Debconf/DbDriver/Stack.pm line 111.
 Use of uninitialized value $val in substitution (s///) at /usr/share/perl5/Debconf/Format/822.pm line 83, <GEN6> line 6.
 Use of uninitialized value $val in concatenation (.) or string at /usr/share/perl5/Debconf/Format/822.pm line 84, <GENG> line 6.
